---

Senior MTS Site Reliability Engineer at Aviatrix with expertise in cloud computing and infrastructure automation. Proven track record of optimizing scalability and cost efficiency, while enhancing performance through proactive monitoring. Strong collaborator with a commitment to security best practices and continuous integration, driving significant improvements in operational reliability.

## Experience

### Senior MTS Site Reliability Engineer | Aviatrix | SEP 2025 - Present

- Managed and optimized production Kubernetes clusters across AWS and GCP, enhancing cluster performance and scalability.
- Automated deployment pipelines and infrastructure as code using Terraform and Helm charts, reducing deployment times and errors.
- Collaborated with development teams to integrate SRE practices into the software development lifecycle, improving overall system reliability.
- Participated in on-call rotations for critical production systems, ensuring 24/7 availability and rapid incident response.

### Senior DevOps Engineer | Aviatrix | Feb 2025 - SEP 2025

- Deployed production infrastructure using Terraform/Terragrunt.
- Architected Kubernetes-as-a-Service platform with ArgoCD.
- Migrated legacy EC2 applications to serverless and CloudFront architectures.
- Maintained corporate network security compliance across multi-cloud environments.

### DevSecOps Engineer | Aviatrix | Aug 2022 - Feb 2025

- Assisted senior engineers in troubleshooting complex problems.
- Collaborated with teams to troubleshoot complex issues, resulting in improved performance and reliability.
- Created detailed documentation for all engineering processes and procedures.

### Information Security Intern | Bank of Southern California | Jul 2021 - AUG 2022

- Experience in network development working directly under the CIO.
- Worked in SharePoint and PowerApps to produce seamless approvals and documentation.
- Introduced to Azure and Microsoft Apps.

## Education

### Bachelor of Science in Applied Mathematics, San Diego State University | May 2021
